ABOUT ME

Junior Software Engineer with over two years of commercial experience at the UWC Innovation Hub, where I progressed from intern to Analyst Programmer and led a team of six. I have recently completed a Full Stack Web Development bootcamp at Zaio Institute of Technology, with hands-on experience building and maintaining applications using JavaScript, HTML, CSS, React, Node.js, Express, REST APIs, and both SQL (relational) and NoSQL databases. I'm comfortable working alongside senior developers on design and implementation, troubleshooting and improving existing systems, and explaining technical work clearly to non-technical people. I'm a fast, self-driven learner looking to grow into a well-rounded software engineer and to deepen my skills in Java and enterprise development.

TECHNICAL SKILLS

Languages & Web: JavaScript (ES6+), HTML5, CSS3, React, responsive design, cross-browser compatibility

Backend & Integration: Node.js, Express.js, REST APIs, third-party service integration (Firebase)

Databases: SQL and relational databases, MongoDB, Firebase Firestore, data modelling and CRUD operations

Engineering Practice: Object-oriented and component-based design, debugging and troubleshooting, version control, Agile collaboration

Tools & IDEs: VS Code, Git, GitHub, Vite, Unity, Blender

PROFESSIONAL EXPERIENCE

Analyst Programmer · UWC Innovation Hub *Apr 2024 – Jun 2026*

- Promoted from intern to lead a team of 6, taking ownership of project delivery, task allocation and day-to-day coordination while working closely with stakeholders on requirements and implementation.
- Contributed to a large-scale VR experience for the Robben Island Museum, a heritage site receiving over 300,000 visitors annually; designed and built an interactive 3D coin reward that users unlock on task completion, adding a gamified element to the experience.
- Managed the end-to-end content pipeline across client projects, from modelling and texturing through to in-engine implementation and integration in Unity.
- Provided technical support, troubleshooting and ongoing maintenance for all AR/VR systems at the Hub, and delivered training sessions and outreach initiatives.

AR/VR Intern · UWC Innovation Hub *Apr 2023 – Apr 2024*

- Collaborated with the development team on immersive software projects and contributed to research exploring AR applications in higher education.
- Set up, configured and maintained AR/VR hardware and software systems.
- Delivered AR/VR training to students and staff using Jigspace, building strong communication skills around technical tools.

PROJECTS

Interactive 3D Portfolio Website *portfolio-website-six-sigma-80.vercel.app*

Stack: React, Node.js, Vite, Three.js, HTML5, CSS3, Git/GitHub

- Built and deployed a full-stack portfolio site using a modular, component-based React architecture designed to be easy to maintain and extend.
- Integrated original 3D models rendered in the browser with Three.js, with attention to performance and responsive layout across devices.
- Managed the codebase with Git/GitHub and Vite build tooling, through to production deployment.

Generic Online Store

Stack: HTML5, CSS3, JavaScript, Firebase, Firestore

- Built a functional e-commerce store with product listings, a working shopping cart and real-time data persistence, integrating the front end with a Firebase Firestore database.
- Implemented cart and user-interaction logic in vanilla JavaScript, testing and debugging data flows between the UI and the backend.

Twitter Clone & Amazon Clone

Stack: HTML5, CSS3, JavaScript

- Recreated the core Twitter/X interface (tweet cards, multi-image grids, composer toolbar, tab navigation) and the Amazon storefront with working cart logic in vanilla JavaScript.

EDUCATION

Full Stack Web Development Bootcamp (Completed) *Feb 2026 – Aug 2026*

Zaio Institute of Technology

- Completed project-based training covering JavaScript, React, Node.js, Express.js, REST APIs, MongoDB, Firebase, Git/GitHub and responsive web application development.

Bachelor of Applied Arts in 3D Animation *May 2019 – May 2022*

STADIO Higher Education

- Studied 3D modelling, animation, digital design and interactive media production, building a strong foundation in how digital experiences are designed and communicated.

ADDITIONAL

Languages: English (fluent), Afrikaans (fluent)

Certification: Full Stack Web Development Bootcamp, Zaio Institute of Technology (Completed, Aug 2026)
